

Mr. Figure\$

Financial Literacy Musical

Liability (Think To Yourself)(Ken)

What did Ken Learn from Mr. Figure\$ during their conversation?

1. Ken learned that people and businesses struggle financially because they have poor control of their cash flow.
 - 1.1. Cash flow is the amount of money flowing in and out.. So think to your self, would you monitor your financial statement to understand the direction of your cash flow?
 2. Ken learned that he could keep it super simple when it comes to investing by investing into companies stocks that he already use or know.
 - 2.2. Think to yourself, would you invest into the companies you already shop at or know? & if so what product stock or business would you invest into?
3. Ken learned that even though he wants to invest into the company product stock of his choice, the company stock he may choose to invest into may decline in customer sales and lose money which he could lose some or all his money he invested into that company product, which now that company stock can be a liability if he don't monitor that stock correctly which using his financial statement can monitor his cash flow of that stock to determine if that asset company product stock is still worth investing into.
 - 3.3. Think to yourself, have you ever invested time or money into something or a person that became a liability and you didn't catch that liability until it was too late because you weren't paying that liability any mind? & if so, how did it impact your life?
4. Ken learned that the rich don't work for money because they invest into ideas to create cash flow to have their money work for them instead of them working hard for their money. The rich recognize great idea investments and they invest to make money off their investment to use the money they made to make more money to continue investing.
 - 4.4. Think to yourself, if you invested into something that made you 3 times the money you put in, wouldn't you use the extra money you made to invest into another idea hoping to make 3 times the money again on that idea investment?

END OF Liability (Think To Yourself)(Ken)

Mr. Figure\$

Financial Literacy Musical

Liability (Think To Yourself)(Mr. Figure\$)

What did Mr. Figure\$ Learn from Ken during their conversation?

1. That ken believes that investing into the company apparel gear that sponsors his school basketball team would make his money grow easy as lemon squeeze.

1.1. Think to yourself, have you ever invested time and money into something that you was sure that it would bring you money and things didn't work out as plan and you had someone who knew more about what you was investing your time and money into then you did and they tried to convince you it wasn't a good idea and that you should be patient about your decision? If so, how did that impact your life?
